BF MEDICAL Co., Ltd.

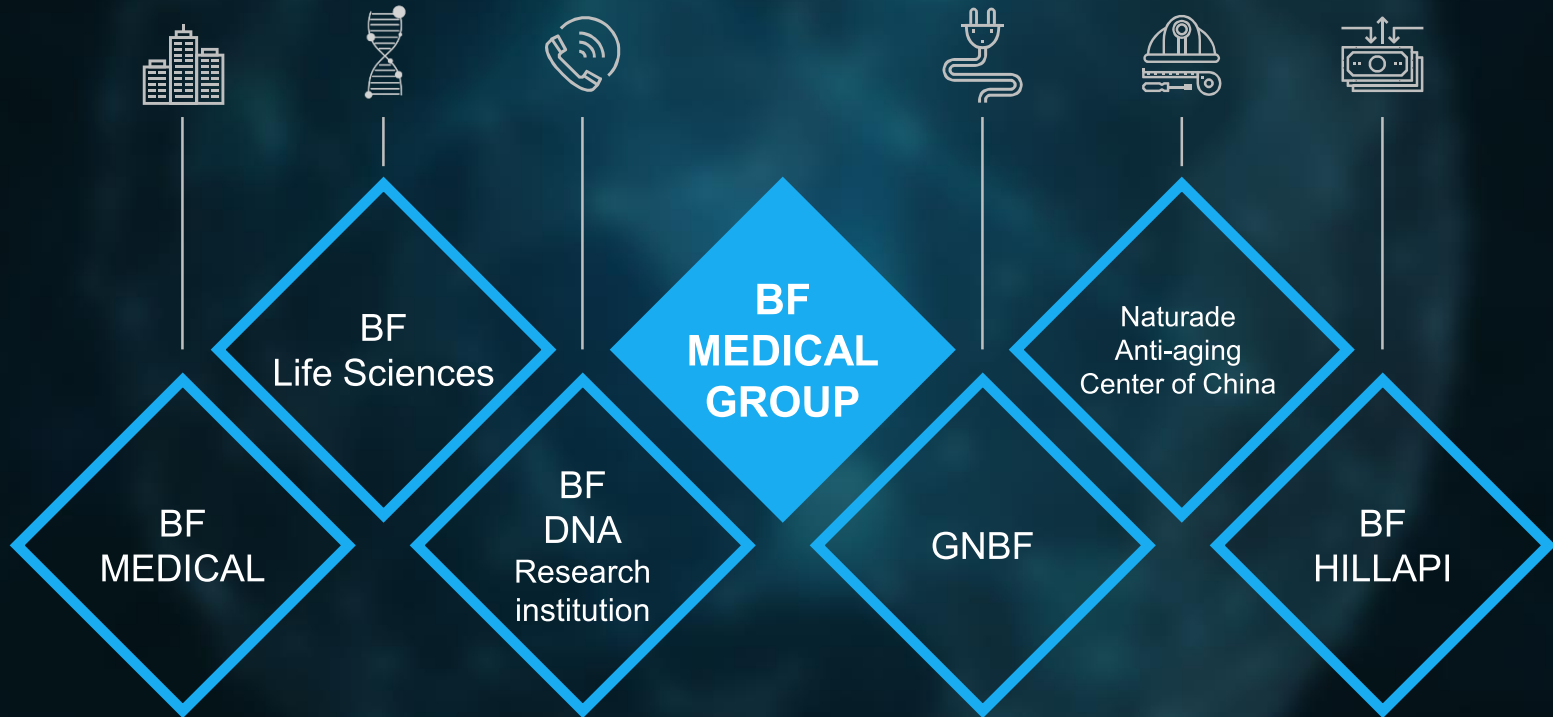

BF Medical Group

takes the lead in supporting management of domestic/foreign hospitals, attracting foreign patients and importing/exporting advance medical services as an international medical cooperation business expert. We are a global healthcare group which conducts R&D in medical equipment, medicine, cosmetics, health food etc industries using the next-generation biotechnology, advanced genome decoding and research on stem cell etc and provides individual theranostics through cooperating with domestic/foreign medical institutions.

Our group takes the initiative in exporting medical services and equipment and executes a variety of educational businesses while operating overseas branches and hospitals based on its know-how to support domestic hospital management. The group, registered with and permitted by KOTRA, Ministry of Health and Welfare, Ministry of Food and Drug Safety etc in relation to its businesses, realizes transparent business policies.

01 MSO

Management Service Organization

1

Hospital Operation Management

As the foundation to create customer value, through the analysis of the interior of the hospital to the construction, and also the establishment of the hospital service system, to provide hospital management support and leading enterprise promotion. Build of global system.

2

Hospital Personnel Management

Cultivate professional talents, improve the efficiency of hospital business and medical service quality.

3

Hospital Customer Management

Through constructing advertising, publicity, customer management, consultant system to effectively manage customers.

4

Medical Tourism

Provide one-stop services to overseas customers, to make high quality hospital diagnosis and treatment, not only provides the Omni-directional service booking(Insurance, passport, visa, airport, etc), Will also provide travel information in South Korea, translation service, cooperation of overseas hospital patient service support.

02 Global Healthcare

Management Solution of Hospitals at Home and Abroad

1

Multi Hospital System

Sharing and mutual cooperation of customer and technique through the relationship of domestic and international hospitals.

2

Smart Solution

From the service of fundamental system establishment such as hospital establishment, management, IT solution and consulting, to the service of human resource management, education, purchase and marketing, we provide a total medical management solutions for customers.

3

Medical technical support for plastic surgery, dermatology, gynecology and dentistry, etc.

03 Education and Training in Solution

Reinforcement of skin barrier,
Soothing, Moisturizing,
Low irritation, Anti-aging,

Daily moisturizing skincare solution

04 Genetic Testing (EXOGENE)

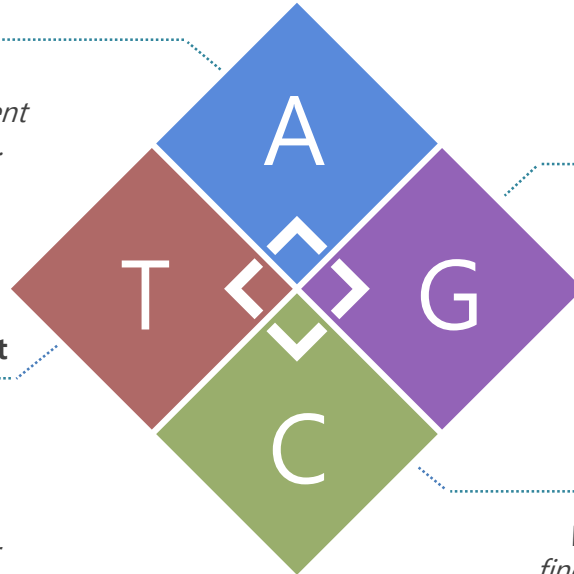

- 7 billion people in the world all have their own DNA which can be detected by 4 bases called A.T.G.C.

Disease Prediction

It predicts risks of cancer, hypertension, diabetes, etc. Also could provide treatment and enables a reasonable insurance plan.

Infant and Children Disease & Talent

*It predicts autoimmune or metabolic diseases infants or children may have in advance, and provide treatment or management if necessary.
It also predicts their learning and motor ability for their future career.*

Health & Beauty

It analyzes genetic traits related to the appearance like skin aging and elasticity, pigmentation, hair loss(alopecia), neutral fat, cholesterol, vitamin C, etc., for a customized fitness care.

Paternity and Blood Relation Test

With unique genetic traits that defines a person like fingerprint, it can detect paternity and blood relations.

A Super Business Beyond the Top for the 21st Century as a Globally Resounding Brand !

Core Competence

Core Capability

- Accumulation of rich experiences and provision of expert solutions.
- Superior human resources by sector.
- Future-oriented, challenging organization.
- Customized one-on-one services.
- A future vision for medical industry.

Objectives

Goals

- Establishment of a global brand image.
- External competitiveness and customer response competence reinforcement.
- Establishment of global network.
- Nurture global talent.
- Establishment of customer satisfaction programs.

[EXOGENE] of BF LIFE SCIENCES is

Understand the risk of disease and prevent in advance

Customized health & beauty solution

Healthy life style solution through customized management

**DNA-Carries important information of our health,
is the key to a deep understanding and efficient prevention to diseases.
Through genetic testing, we can predict, prevent and treat disease early and efficiently.**

Genetic testing analyzes genes and chromosomes etc. for identifying individuals and examining causes of certain disease or state etc. It is used in many fields as not only information on genetic disease but important health information can be obtained through it.

Recently, as countless human genes have been found as well as their functions through the Human Genome Project (HGP), utilization of particular genetic testing has increased including identification of personal characteristics, prediction/prevention as well as monitoring and treatment of disease etc.

EXOGENE Advantages of Genetic Testing

1

Identification of Root

Different with clinical diagnosis that based on symptom or syndrome after it shown, genetic testing could find the root of disease, helps to prevent and treat diseases easily.

2

Predictability

It is possible to predict occurrence of disease in advance before any symptom or syndrome is shown.

3

Preventability

It is possible to prevent and treat disease in early phase through managing diet and lifestyle based on predicted disease and genetic traits.

4

Maximized Treatment Effect

Minimize side effect while maximizing treatment effect by predicting suitable food, medicine etc.

The image features a hand pointing towards a target with an arrow hitting the bullseye. From the target, several arrows point to the right. To the left of the target, there are several overlapping, glowing DNA double helix structures. The background is a dark, blurred image of a person in a suit.

- ◇ **Prevention of disease**
 - Prediction of individual susceptibility
 - Customized management and medical check-up
- ◇ **Reduction of medical cost**
 - Customized treatment
 - Highly efficient treatment
 - Prevention of treatment or drug abuse
- ◇ **Extension of health life expectancy**
 - Customized cosmetics
 - Customized healthy food

We promote a variety of businesses to lay the foundation for industrializing individually customized service through developing bioinformatics analysis technology supporting converged analysis between genetic information and clinical information, analysis of converged genome for finding biomarker and establishment of genetic information DB for examining individual genetic traits.

Better understanding on own health and health-prevention through understanding genetic traits precisely

Manage Disease

General care

Provide care method based on outward appearance

Possible side effect
Depending on genetic traits and tendencies

Customers dissatisfaction,
Lowered brand image

Care based on genetic testing

Provide individual care method based on genetic traits and outward appearance

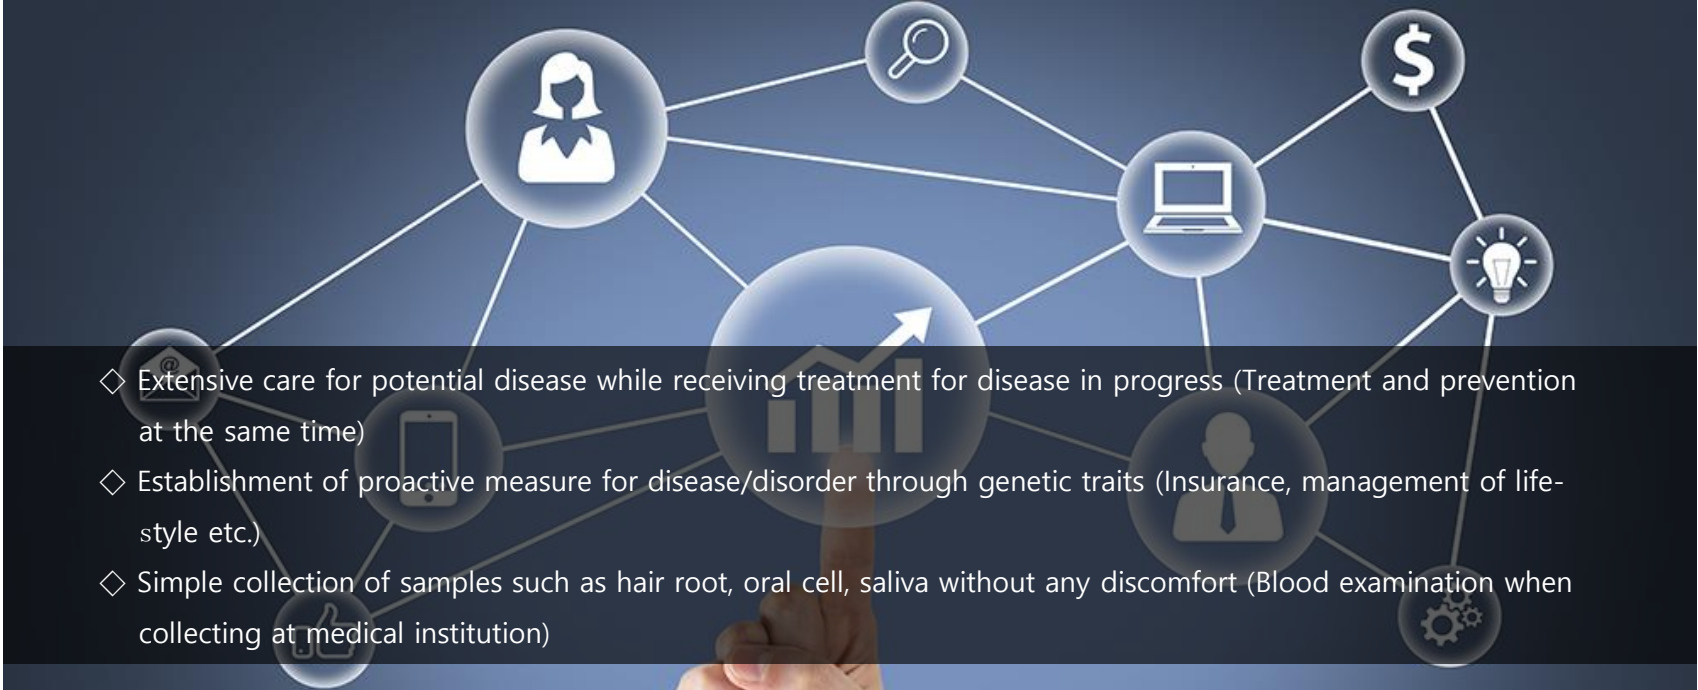

Minimize side effect while maximizing care effect

Customers satisfaction,
Improved brand image

※ Earn the trust of customers with the customized care method through scientific based genetic testing.

Hold a competitive edge over competitors through customized care based on scientific basis.

Holding a competitive edge over competitors

Online D Cosmetics

Increase the customer satisfaction through providing customized cosmetics based on genetic testing

Dermatology R, Gangnam

Satisfy confidence and satisfaction of customers by recommending appropriate diet, ingredients of cosmetics based on genetic traits while providing skin treatment

Internal medicine hospital Y, Gangnam

Form a difference with competitors through providing genetic testing based disease(dementia, cancer, etc.) prevention and treatment program

※ There are many other cases holding a competitive edge through genetic testing in various industries including examination center, depletion clinic, beauty salon, health functional food etc. in addition to the cases above.

Preliminary inspection of illness and disease

Male	Stomach cancer	Lung cancer	Colon cancer	Liver cancer
	Prostate cancer	Pancreas cancer	Thyroid cancer	Tumor suppression ability
	Cardiovascular disease	Hair loss	Dementia	Diabetes

Female	Stomach cancer	Lung cancer	Colon cancer	Liver cancer
	Breast cancer	Ovarian cancer	Thyroid cancer	Tumor suppression ability
	Cardiovascular disease	Pancreas cancer	Dementia	Diabetes

※Customized genetic testing package is available according to efficiency.

EXOGENE Usage of Genetic Testing Kit (Buccal Epithelial Cell Kit)

STEP1

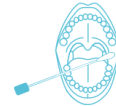

◆ Please prepare the buccal epithelial cell kit.

STEP2

◆ Open the kit by turning the cap of kit counterclockwise.
* Please do not touch the cotton swab by hand and keep it clean before using

STEP3

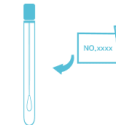

◆ Swab 20 times on each side of mouth by cotton swab.
* As the mouth mucosa membrane is easy to get injured, please do not swab the inside of mouth too hard

STEP4

◆ Put the cotton swab back to kit and seal the kit

STEP5

◆ Please put buccal epithelial cell kit and document with signature into envelope, and mail the envelope to the address on the envelope(freight collect payment)

Click here to know more about the usage of genetic testing kit:

검사항목 안내

피부탄력: IG, TG, MMPI

당신의 유전자 분석 결과 피부탄력 저하 위험성이 낮습니다.

지도사항

피부의 탄력성은 노화, 호르몬, 관리와 밀접한 관련이 있습니다. 유전자 검사 Type 1, 2, 3은 노화 속도를 어느 정도로 나타내는 Type 1 유전자형이, Type 2 유전자형이, Type 3 유전자형이 나타났습니다. MMPI 유전자의 내외 균형하는 유전자형에 따라 Type 1과 Type 2 유전자형이 나타났다면 피부가 탄력적일 가능성이 높고 Type 3 유전자형이 나타났다면 피부가 탄력적이지 않을 가능성이 높습니다.

MMPI 유전자형 분석한 결과 유전자 변이가 없는 안전한 IG/TG 타입으로 분석되었으며 피부 탄력의 저하 위험성이 낮지만 평소에도 꾸준한 관리하여 피부 탄력 저하를 사전에 예방하는 것이 좋습니다.

피부탄력 유전자에 대한 설명

피부탄력에 관여하는 MMPI 유전자 (Matrix Metalloproteinase 1) 유전자형은 Matrix Metalloproteinase(MMP) 인자 발현을 통한 노화 촉진인 Matrix Metalloproteinase 발현을 억제함으로써 노화 속도를 늦추고 피부 탄력을 유지하는 역할을 합니다. MMPI 유전자형에 따라 Type 1, Type 2, Type 3 유전자형으로 분류되며 Type 1 유전자형은 노화 속도를 늦추는 역할을 하며 Type 2 유전자형은 노화 속도를 늦추는 역할을 하며 Type 3 유전자형은 노화 속도를 늦추는 역할을 합니다.

EXOGENE

피부노화 예방 가이드

건강한 식습관 지키기

건강한 식습관은 노화를 촉진하는 인자(예: 인슐린, IGF-1)를 낮추고 노화 관련 호르몬을 조절하는 데 도움이 됩니다. 특히 과일과 채소는 항산화 효과를 높여 노화를 예방하는 데 도움이 됩니다.

올바른 수면 습관

수면 부족은 노화를 촉진하는 인자(예: 코르티솔)를 높이고 노화 관련 호르몬을 조절하는 데 도움이 됩니다. 특히 수면 부족은 노화를 촉진하는 인자(예: 코르티솔)를 높이고 노화 관련 호르몬을 조절하는 데 도움이 됩니다.

세안은 미지근한 물로

뜨거운 세수는 피부 장벽을 손상시키고 노화 관련 호르몬을 조절하는 데 도움이 됩니다. 특히 뜨거운 세수는 피부 장벽을 손상시키고 노화 관련 호르몬을 조절하는 데 도움이 됩니다.

피부 보습제 사용

수분 보습제는 노화를 촉진하는 인자(예: 코르티솔)를 낮추고 노화 관련 호르몬을 조절하는 데 도움이 됩니다. 특히 보습제는 노화를 촉진하는 인자(예: 코르티솔)를 낮추고 노화 관련 호르몬을 조절하는 데 도움이 됩니다.
