Glovi's Features

GLOVI PLASTIC SURGERY

Head surgeon's exclusive responsibility

Glovi Plastic Surgery offers personalized consultation with medical team with an extensive clinical experience. As consultation is the first step leading to the surgery, we promise that we will listen carefully to the patients' words and make them be satisfied with the results of the surgery. Surgeons in charge will communicate with the patients and take care of them from the surgery to post-op treatments personally.

Detailed post-op care and advanced equipment

Post-op care is as important as the outcome of the surgery and can be called an extension of the surgery. To help the patients with faster recovery, Glovi Plastic Surgery offers free swelling and post-op care through ultrasound massage, Smartlux, etc. Glovi Plastic Surgery is equipped with advanced medical device system to perform detailed and safe surgeries, and maintains a safe

Continuous research activities

Glovi Plastic Surgery's surgeons engage in continuous research activities to perform successful surgeries. Based on various researches, they actively participate in academic activities and are always open to possibilities of development to perform ideal surgeries. We will always do our best to satisfy the patients with the best results.

Care system for foreign VIP patients

Glovi Plastic Surgery offers free consultation and interpretation service for the convenience of foreign patients. There are counseling rooms, resting area, etc. prepared for the patients. Dedicated medical team will take care of foreign patients from consultation to surgery.

Stem Cell Research Laboratory

GLOVI PLASTIC SURGERY

Glovi's Stem Cell Research Laboratory certified as a research and development facility by the Ministry of Science, ICT and Future Planning creates the future of plastic surgery through an individual research. Research laboratory collects and analyzes stem cells needed for surgical procedures in a professional facility with researchers. It is located inside the clinic, so the collected stem cells can be transferred immediately, what increases their engraftment rate and vitality.

Sterile facility

Maintaining a sterile facility, from the process of collecting and analyzing stem cells to the surgery, reduces the risk of infection and maintains a sterile environment that is fundamental to safety.

Professional research team

Glovi's specialized medical team and researchers are committed to continuous clinical experiments and research in order to achieve the best quality stem cells and perform successful surgeries.

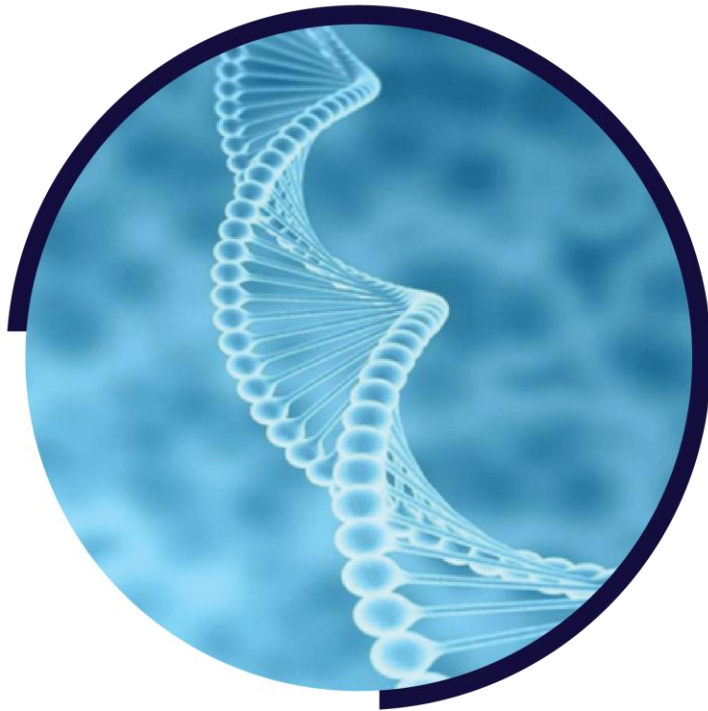

Advanced technology

Even if performed under the same conditions, an outcome of the surgery can vary depending on how many stem cells were extracted and how fast they were transferred. Glovi increases the surgery success rate by using an advanced technology and transferring faster a bigger amount of preserved cells.

Stem Cell Plastic Surgery

GLOVI PLASTIC SURGERY

Stem Cell Fat Graft

Glovi Plastic Surgery's Stem Cell Fat Graft is a revolutionary surgical method that adds volume to the face safely and naturally by using only stem cells derived from pure fat.

Inner Vital Nose Revision Surgery

After grafting stem cells to regenerate damaged tissues, using autologous tissues such as dermis, ear cartilage, etc. to minimize the side effects. Stem cells quickly regenerate damaged tissues, what allows for a safe nose revision surgery.

Stem Cell Breast Surgery

Stem Cell Breast Surgery is a method of taking out the unnecessary fat from the body and grafting it to the breast area without using breast implants. This procedure is for those who want natural volume and elastic breasts without artificial feeling. As the surgery includes removing unnecessary fat, it is recommended for people with chubby body type, who are concerned about their small breast.

Stem Cell Anti-Aging Treatments

Stem cells help with curing serious diseases such as diabetes, heart diseases, etc.. They also improve immunity and have an anti-aging effect.

Stem Cell Scar Treatment

Treatment of surgical scars, stretch marks after pregnancy, acne scars, etc.
